

Gravförteckning

Gravförteckningen redovisar alla gravar och skelett som dokumenterades vid den arkeologiska undersökningen i kvarteret Humlegården 3 i Sigtuna 2006. Varje gravnummer representerar en grav med en eller flera individer. Individerna illustreras med en renritning baserad på de digitala fotografier som togs på varje individ. Norr är alltid uppåt i figurerna, men renritningarna är inte exakt skalnlige. Under varje grav redovisas också de kontextnummer eller stratigrafiska objekt som utgör graven och som kunde identifieras: SI=individ, SK=konstruktion, SF=fyllning och SN=nedgrävning. Kontextnumren för de stratigrafiska objekten kan användas som nyckel i sökning efter mer information om varje grav i medföljande listor på CD-skivan.
